

16th October 2023 - Tamworth, UK

Home Decarbonisation Skills Training Competition

Supported by the Department for Energy, Security and Net-Zero and the Midlands Net-Zero Hub

Trade Engine are delighted to announce that we have been selected as one of the delivery partners by the Midlands Net-Zero Hub, for the Government's Home Decarbonisation Skills Training Competition (Phase 2).

This scheme provides grants towards a range of training opportunities for individuals to enter the UK's energy efficiency and retrofit sectors, or those looking to upskill. Retrofit is an exciting growth-industry, with new standards such as PAS 2035 creating roles that are now in significant demand. It is estimated that 27 million properties will require some form of retrofit intervention by 2030 for the UK's net-zero targets to be met.

In partnership with **Synergy Training Centre**, Trade Engine will offer three key courses, all of which are accredited by either **ABBE** or **NOCN**:

- **Level 5 Diploma in Retrofit Coordination and Risk Management** – creating 150 new Retrofit Coordinators to oversee the implementation of PAS 2035;
- **Level 3 Certificate for Retrofit Assessors** – creating 50 new Assessors;
- **Level 3 Award in Energy Efficiency for Older & Traditional Buildings** – 100 places are available to existing retrofit professionals to work in this critical area.

Interested candidates are invited to apply for these opportunities between now and March 2024. Trade Engine and Synergy offer a unique approach to retrofit training, which we deliver in a learner-led fashion, using a blend of eLearning, online meetings and in-person training. This allows us to offer training across all Local Net Zero Hub regions from our bases in the East and West Midlands.

Applications can be made [via the training page on our website](#).

Full details of all the courses on offer are presented this page. We then ask for a short on-boarding questionnaire to be completed, after which one of our Trainers will be in touch to review your application with you and to answer any questions. Please do feel free to call us on **0330 223 0606** for further information at any stage.

We're proud to be working with:

Trade Engine Limited is registered in England, company no.: 10278876.
